

WORKSHEET-2

Q1. For a particular year, following is the distribution of ages (in years) of primary school

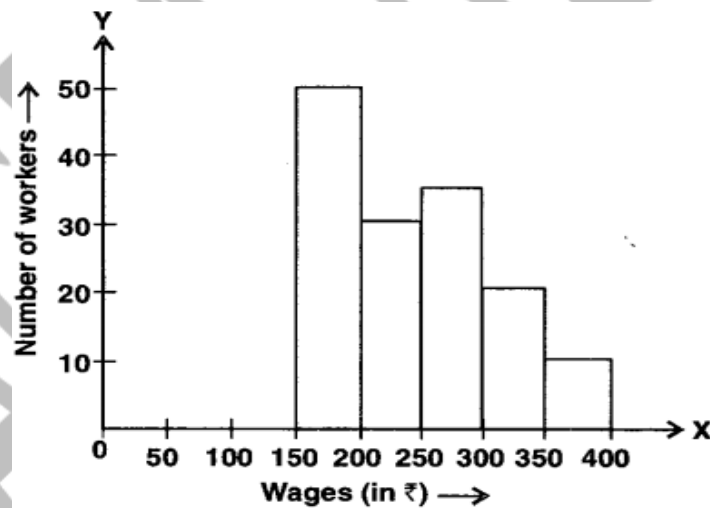

| Age (in years) | 15 - 20 | 20 - 25 | 25 - 30 | 30 - 35 | 35 - 40 | 40 - 45 | 45 - 50 |
|------------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| No. of Teachers | 10 | 30 | 50 | 50 | 30 | 6 | 4 |

teachers in a district:

1. Write the lower limit of first class interval.
2. Determine the class limits of the fourth class interval.
3. Find the class mark of the class 45 – 50.
4. Determine the class size.

Q2. The class marks of a frequency distribution are 104, 114, 124, 134, 144, 154, 164. Find the class size and class intervals.

Q3. In figure, there is a histogram depicting daily wages of workers in d factory. Construct the frequency distribution table.

Q4. A random survey of the number of children of various age groups playing in a park was found as follows

| Age(in years) | Number of Children |
|----------------------|---------------------------|
| 1 - 2 | 5 |
| 2 - 3 | 3 |
| 3 - 5 | 6 |
| 5 - 7 | 12 |
| 7 - 10 | 9 |
| 10 - 15 | 10 |
| 15 - 17 | 4 |

Draw a histogram to represent the data above.

Q5. The following two tables gives the distribution of students of two sections according to the marks obtained by them

| Section-A | | Section-B | |
|------------------|------------------|------------------|------------------|
| Marks | Frequency | Marks | Frequency |
| 0 - 10 | 3 | 0 - 10 | 5 |
| 10 - 20 | 9 | 10 - 20 | 19 |
| 20 - 30 | 17 | 20 - 30 | 15 |
| 30 - 40 | 12 | 30 - 40 | 10 |
| 40 - 50 | 9 | 40 - 50 | 1 |

Represent the marks of the students of both the sections on the same graph by two frequency polygons. From the two polygons compare the performance of the two sections.
